SKILLS

- Front-end web development.
- Advanced skills in modern front-end development, including JavaScript, CSS, HTML, React, Bootstrap, Tailwind CSS.
- Experience in component-based architecture, particularly with React.
- Familiarity with web browser APIs and HTTP.
- Experience building backend server using NodeJS, PostgreSQL, MongoDB and Express.
- Proficient in principles and practices of Test-Driven Development (TDD)
- Skilled in utilizing Git and GitHub, to manage and track changes in code repositories effectively.
- Adherence to clean code principles.
- Collaboration with cross-functional teams.
- Strong communication skills and proactive approach to feedback.
- Desire to work in respectful, transparent, and collaborative environment.

PROFESSIONAL SUMMARY

As a dynamic Front End Developer, I specialize in creating modern, user-centric websites and full stack applications, with proficiency in HTML, CSS, JavaScript, React, and NodeJS, underpinned by agile development practices. My engineering background, enriched with intensive training at La Fosse Academy, has equipped me with a unique combination of technical acumen and problem-solving skills. Committed to continuous learning and adept at managing projects to meet tight deadlines, I am constantly seeking opportunities to enhance my expertise and stay aligned with the latest trends in web development.

WORK HISTORY

Tech Trainee, 09/2023 to 11/2023

La Fosse Academy - London

- Led a team in developing customer-focused web applications, closely collaborating with designers to translate prototypes into fully functional web applications.
- Applied agile principles and enhanced project management and teamwork skills.
- Strengthened proficiency in web development, emphasizing design and problem-solving.

Heating Engineer, 11/2017 to 09/2022

North Tyneside Council - North Shields, North Tyneside

- Maintained heating systems in public facilities, conducting troubleshooting and repairs on an average of 50 systems per week.
- Displayed strong collaborative skills within the team, resulting in a 10% increase in overall team productivity.

EDUCATION

Full Stack Web Developer: Software Development, 09/2023 – 11/2023

La Fosse Academy - London

- Full Stack Web Developer: Focused on modern front-end development techniques, including extensive use of JavaScript, React, CSS, and HTML. Projects and coursework emphasized building responsive, user-centric web interfaces, aligning with agile development methodologies.

Full Stack Web Development: Web Development, 11/2022 – 03/2023

Codecademy - Online

- Acquired in-depth knowledge of front-end development, focusing on user interface design, responsive web design, and client-side scripting. Developed skills in back-end programming, learning about server-side technologies, databases, and application programming interfaces (APIs).

NVQ Level 3: Engineering, 09/2004 – 06/2005

South Tyneside College - South Tyneside
